Smithsonian Chandra - FETTU Braille Project

6/16/09

This case contains [5] framed graphic stands. The main frame and graphic remains assembled at all times. Installation requires the addition of [2] feet/supports to each frame. They attach with rotolocks using an Allen wrench.

Disassembly requires the removal of the [2] feet/supports from each frame. Pack into case **making sure there is a layer of protective cardboard between each frame and leg set.**
FINISHED UNIT LOOKS LIKE THIS:

Disassembly & Case Packing

Disassembly requires the removal of the [2] feet/supports from each graphic frame.

Pack 10 feet/supports into the case first, two per layer, making sure there is a layer of protective cardboard between each set.

Pack 5 graphic frames into the case next, making sure there is a layer of protective cardboard between each frame.
